Business Overview in the Consolidated Fiscal Year 2010

As for the global economy in the consolidated fiscal year 2010, the entire Asian economy expanded, while a full-scale economic recovery still continued to elude the US, along with credit uncertainty in Europe, the global economy resulted in a gradual recovery. The Japanese economy remained on a recovery trend but fell into an unprecedented crisis due to the influence of the Great East Japan Earthquake occurred in March 2011.

Under such circumstances, by making full use of its power, the Toshiba Tec Group was committed to providing total solutions, developing new products such as Environmentally Conscious Products (ECPs), and expanding its business scale by focusing on emerging countries and areas expected to grow, along with increasing earning power by streamlining resources.

From April 1, 2010, we devoted ourselves to further developing business operations centering on the system solutions business, document solutions business and international POS, AI & printer business, with the aim of expanding business areas at the earliest date possible and establishing ourselves as a total solution provider.

Sales steadily increased initially, but due to the Great East Japan Earthquake and fluctuations in exchange rates, finally amounted to 362,302 millions of yen, a 1% decrease over the previous consolidated fiscal year. Our efforts to enhance earning potential resulted in an increase in operating income of 44% over the previous consolidated fiscal year to 13,996 millions of yen, an increase in ordinary income of 47% over the previous consolidated fiscal year to 10,605 millions of yen, and an increase in net income of 57% to 6,510 millions of yen.

The business highlight for each report segment

The business highlights for each report segment in the consolidated fiscal year 2010 are described below.

System Solutions Business

The system solutions business that deals with POS systems for the Japanese market, MFPs, Automatic Identification Systems and related products, was committed to developing new products appropriate to market needs, expanding sales of core products, and promoting area marketing, along with streamlining sales and service systems at home to strengthen a high-profit structure under the severe business environment where weak demand continued due to restricted capital investment in the retail industry.

However, our customers and markets, especially in the Tohoku area, as well as our business were worst affected by the Great East Japan Earthquake.

Steady growth in sales of POS systems for mass-sales shops despite the influence of the earthquake resulted in an increase in sales of overall POS systems.

Other products also witnessed an increase in sales, since sales of automatic identification systems experienced a steady growth.

As a result, sales of the system solutions business increased 2% over the previous consolidated fiscal year to 167,478 millions of yen, while operating income increased 61% to 5,740 millions of yen from the previous consolidated fiscal year.

Toshiba Tec Corporation had Kokusai Chart Corporation as its subsidiary by making a tender offer in March 2011, with the aim of maximizing corporate value by incorporating and fusing our bar code printer technology and solution proposals with paper processing technology of Kokusai Chart.

Document Solutions Business

The document solutions business that deals with MFPs and inkjet print heads for markets outside Japan, faced a difficult business climate marked by the appreciation of the yen and intense competition with rivals. Even under such circumstances, this segment focused efforts on further expanding sales of strategic products including high-speed and middle-speed full color MFPs, while further expanding sales and improving management efficiency in emerging markets.

Sales of MFPs decreased due to fluctuations in exchange rates despite an increase in Asia and steady growth in North America and Europe.

Other products witnessed an increase in sales, since sales of inkjet print heads significantly increased.

As a result, sales of the document solutions business decreased 4% over the previous consolidated fiscal year to 165,345 millions of yen, while operating income increased by 8 millions of yen over the previous consolidated fiscal year to 4,337 millions of yen.

International POS, AI & Printer Business

The international POS, AI & printer business that deals with POS systems for markets outside Japan, Automatic Identification Systems and printers, devoted itself to developing new business areas, sales routes and customers, expanding sales by promoting alliance strategies as well as improving profitability by enhancing cost competitiveness, in a severe business environment resulting from continuous intense competition with rivals and a negative impact due to fluctuations in exchange rates.

POS systems and Automatic Identification Systems witnessed an increase in sales, especially in Asia.

ODM such as printers witnessed an increase in sales despite fluctuations in exchange rates.

As a result, sales of the international POS, AI & printer business increased 5% over the previous consolidated fiscal year to 41,826 millions of yen, while operating income increased 113% to 3,918 millions of yen from the previous consolidated fiscal year.

Notes: (1) Automatic Identification (AI) Systems refer to systems, which contain hardware and software to automatically retrieve, identify and manage data, from bar codes and IC tags.

(2) ODM refers to designing and manufacturing products with customer brand.

Key Achievements for 2010

- No.1 share POS terminal market ('09) in Japan for eight consecutive years. [Unit share of Japanese market: 42%]
- No.1 share in A3 MFP market in China for eleven consecutive years. [Unit share of Chinese market: 18%]

- Kokusai Chart Corporation becomes a Toshiba Tec subsidiary in March 2011.

Forecast for fiscal year 2011

As for the future global economy, Asia's economic expansion is expected to continue and the US economy is expected to remain on a recovery trend. The European economy is concerned about a weak recovery due to budget austerity although the German economy is expected to grow steadily. Although the Japanese economy was expected to recover, it is expected to continue to be in a difficult situation because economic activities slow down and consumer spending will remain weak due to the influence of the Great East Japan Earthquake.

Under such circumstances, by making full use of its power, the Toshiba Tec Group is committed to providing total solutions, developing and introducing differentiated products such as Environmentally Conscious Products (ECPs) and integrated products, and expanding its business scale by focusing on emerging countries and areas expected to grow, along with increasing earning power by streamlining resources and assets together.

From April 1, 2011, we have established new global solutions business by merging the document solutions business and international POS, AI & printer business, with the aim of further streamlining and expanding international operations. We are committed to further developing business operations in markets centering on both the system solutions business and the document solutions business

Major measures on a segment basis for fiscal year 2011 ending March are as follows:

• System Solutions Business

The system solutions business strives to promote area marketing, develop new products appropriate to market needs, and enhance service and supply business, toward expanding sales of POS systems, MFPs, automatic identification systems such as bar code systems and RFID systems, and related products into the Japanese market as well as providing total solutions. The system solutions business is also committed to further streamlining sales and service systems at home to strengthen a high-profit structure.

• Global Solutions Business

The global solutions business strives to develop and introduce strategic products, as well as expand sales and marketing in response to the region, optimize sales and service channels, toward expanding sales of POS systems, MFPs, automatic identification systems such as bar code systems and RFID systems, and related products into markets outside Japan as well as providing total solutions, which capitalize on a wide range of products and markets. The global solutions business is also committed to expanding business by enhancing operations in emerging countries and areas.

Notes: RFID refers to a system, which identifies and manages articles by attaching an IC tag to articles and moving the tag to the reader device.

The accompanying Notes to Consolidated Financial Statements are an integral part of these statements.

1. Basis of Presenting Consolidated Financial Statements

The consolidated financial statements of TOSHIBA TEC CORPORATION (the “Company”) have been prepared in accordance with accounting principles generally accepted in Japan, which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards, and are compiled from the consolidated financial statements prepared by the Company as required by the Financial Instruments and Exchange Law of Japan.

Certain reclassifications have been made to present the consolidated financial statements in a format which is more familiar to the readers outside Japan.

Solely for the convenience of the readers, the consolidated financial statements have been presented in U.S. dollars by translating Japanese yen amounts at the exchange rate of ¥83.15 = US\$1.00 prevailing as of March 31, 2011. The translation should not be construed as a representation that the Japanese yen could be converted into U.S. dollar at the above or any other rate of exchange.

2. Summary of Significant Accounting Policies

(A) Basis of Consolidation and Accounting of Investments in Affiliated Companies

The consolidated financial statements include the accounts of the Company and its significant majority-owned subsidiaries (together the “Companies”). For the years ended March 31, 2011 and 2010, the accounts of 58 and 72 subsidiaries are consolidated, respectively. All significant inter-company transactions and accounts are eliminated in consolidation.

All assets and liabilities of the consolidated subsidiaries are revaluated on acquisitions, if applicable. The difference between the cost of investments in subsidiaries and the equity in their assets and liabilities at the dates of acquisition is recognized on goodwill in the consolidated balance sheet and principally amortized by the straight-line method over 5 to 15 years.

The Company has no unconsolidated subsidiary for which the equity method of accounting has been applied for the years ended March 31, 2011 and 2010.

From the perspective of immateriality, the investments in the remaining unconsolidated subsidiaries and affiliated companies are stated at cost.

Certain subsidiaries have year end which differs from that of the Company. As a result, adjustments have been made for any significant transactions that took place during the period between the year end of the subsidiaries and the year end of the Company.

(B) Foreign Currency Translation

Revenue and expense accounts of foreign consolidated subsidiaries are translated into yen using the annual average rate during the year. The balance sheet accounts, except for the components of net assets, are translated at the rate in effect at the balance sheet date. The components of net assets are translated at their historical rates. Translation adjustments are presented

as a component of “Accumulated other comprehensive income” under Net Assets in the consolidated balance sheets.

Foreign currency transactions are measured at the applicable rates of exchange prevailing at the transaction dates, unless hedged by foreign exchange contracts. Assets and liabilities denominated in foreign currencies at the balance sheet date are re-measured at the applicable rates of exchange prevailing at that date, unless hedged by foreign exchange contracts. Exchange differences are charged or credited to operations.

(C) Cash and Cash Equivalents

Cash and cash equivalents include all highly liquid investments, generally with original maturates of three months or less.

(D) Investment Securities

Marketable securities classified as “Other securities” are reported at fair value with unrealized holding gains or losses, net of taxes, presented as a component of “Accumulated other comprehensive income” under Net Assets in the consolidated balance sheets. Cost of securities sold is determined by the moving average method.

Non-marketable securities classified as “Other securities” are carried at cost, which is determined by the moving average method. Supplies are principally stated at the latest purchase cost method.

(E) Inventories

Finished goods, merchandises and semi-finished components are principally stated at the lower of cost, determined by the first-in, first-out method, or market, or at the cost determined by the specific cost method. Work-in-process is principally stated at the lower of cost, determined by the moving average method, or market, or at the cost determined by the specific cost method. Raw materials are principally stated at the lower of cost, determined by the moving average method, or market. Supplies are principally stated at the latest purchase cost method.

(F) Property, Plant and Equipment and Depreciation

Property, plant and equipment are carried at cost. Material improvements are capitalized, but repair and maintenance including minor improvements are charged to income.

Depreciation of property, plant and equipment is generally computed by the declining-balance method for the Company and its domestic subsidiaries, and by the straight-line method for the overseas subsidiaries, at the rates based on the estimated useful lives of the respective assets. The useful lives of principal property, plant and equipment are summarized as follows:

Buildings and structures	15 to 38 years
Machinery and equipment	5 to 13 years
Tools, furniture and fixtures	1 to 6 years

(G) Intangible Assets and Amortization

Intangible assets are amortized by the straight-line method over their estimated useful lives.

Goodwill recognized through purchase and acquisition of subsidiary is basically amortized by the straight-line method over 5 to 15 years period.

(H) Allowance for Doubtful Accounts

Allowance for doubtful accounts is provided in the amount sufficient to cover probable losses on collection. It consists of individually estimated uncollectible amounts and an amount calculated using the rate of actual losses on collection in the past.

(I) Accrued Bonuses to Directors and Corporate Auditors

The bonuses to directors and corporate auditors are accounted for as an expense of the accounting period in which such bonuses were accrued.

(J) Retirement Benefits

Upon retirement or termination of employment, employees of the Company and its domestic subsidiaries are generally entitled to lump-sum payments determined by reference to their current basic rate of pay, length of service and conditions under which the termination occurs.

The Company and its domestic subsidiaries provide allowance for the retirement benefits and make contributions to a non-contributory tax-qualified pension plans (the "Funded Plan") for employees' severance indemnities payable, as part of the existing retirement plan.

Allowance for the employees' retirement benefits are determined mainly at the amount based on the retirement benefit obligation and the fair value of the pension plan assets, as adjusted for amortization of unrecognized actuarial gain or loss and past service costs.

(K) Leases

The Companies lease certain equipment under non-cancelable lease agreements referred to as finance leases. Prior to April 1, 2008, finance leases other than those which transfer the ownership of the leased property to the Companies had been primarily accounted for as operating leases. Depreciation at lease assets are calculated by the straight-line method over the lease period with no residual value.

(L) Income Taxes, Deferred Tax Assets and Liabilities

Deferred tax assets and liabilities are determined based on the differences between financial reporting and the tax bases of the assets and liabilities, and are measured using the enacted tax rates and laws which will be in effect when the differences are expected to reverse.

The Company and its wholly owned domestic subsidiaries file their consolidated tax return in Japan for the Corporation Tax purpose.

(M) Consumption Taxes

Consumption taxes withheld from sales and paid upon purchasing goods and services by the Companies are not included in revenues and expenses.

(N) Derivative Financial Instruments

The Company and certain subsidiaries have entered into forward exchange contracts to hedge the risk of fluctuation in exchange rate in the foreign currency transactions related to accounts receivable and payable denominated in foreign currency.

Derivative financial instruments are reported at fair value with unrealized gain or loss, charged or credited to operations, except for those which meet the criteria for the deferral hedge accounting under which unrealized gains or losses is deferred as assets or liabilities. Receivables and payables hedged by qualified forward foreign exchange contracts are translated at the corresponding foreign exchange contract rates.

(O) Revenue Recognition

Sales are generally recognized at the time of shipment of the goods to customers except for sales of certain product, which are recorded in the accounts upon customer acceptance.

(P) Research and Development Expenses

Research and development costs are charged to income as incurred.

(Q) Impairment of Fixed Assets

According to the accounting standard, fixed assets are reviewed for impairment at least once a year and whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

(R) Accounting Standard for Construction Contracts

Effective for the year ended March 31, 2010, the Company and its domestic subsidiaries adopted the "Accounting standards for construction contracts" and "Implementation Guidance for accounting standards for construction contracts". This change in accounting had no impact on operating income and income before income taxes and minority interest.

(S) Partial Amendments to Accounting Standard for Retirement Benefits (Part 3)

Effective for the year ended March 31, 2010, the Company and its domestic subsidiaries adopted the "Partial Amendments to Accounting Standard for Retirement Benefits (Part3)". As an actuarial gain or loss is amortized starting as an expense from the following year, this change in accounting had no impact on operating income and income before income taxes and minority interest. As the adoption of this accounting, an unrecognized balance of retirement benefit obligations is ¥364 millions as of March 31, 2010.

(T) Application of Accounting Standard for Asset Retirement Obligation

Effective for the year ended March 31, 2011, the Company adopted the "Accounting Standard for Asset Retirement Obligations" and the "Guidance on Accounting Standard for Asset Retirement Obligations". This change in accounting had only minor impact on operating income, ordinary income and income before income taxes for the year ended March 31, 2011.

(U) Application of Accounting Standard for Business Combinations and Others

Effective for the year ended March 31, 2011, the Company adopted the "Accounting Standard for Business Combinations", the "Accounting Standard for Consolidated Financial Statements", the "Partial Amendments to accounting Standard for Research and Development Costs", the "Accounting Standard for Business Divestitures", the "Accounting Standard for Equity Method of Accounting for Investments" and the "Guidance on Accounting Standard for Business Divestitures".

(V) Change in Presentation (Consolidated Statement of Operations)

Effective for the year ended March 31, 2011, the "Company adopted the rules stipulated in Cabinet Office Ordinances Revising Some Portions of the Regulations for Financial Statements" in line with the "Accounting Standard for Consolidated Financial Statements". The Company newly reported "Income before minority interests"

(w) Additional Information

Effective for the year ended March 31, 2011, the Company adopted the "Accounting Standard for Presentation of Comprehensive Income". However, the amounts of "Valuation and translation adjustments" and "Total valuation and translation adjustment" in the previous year are presented as "Accumulated other comprehensive income" and "Total accumulated other comprehensive income", respectively.

1. Policy for financial instruments

The Companies raise funds mainly using Toshiba Group Finance program. Essentially the Companies use the program in the Companies have temporary excess funds. The Companies use derivatives for the purpose of reducing risks (described below) and does not enter into derivatives for speculative or trading purposes.

2. Types of financial instruments and related risks

Trade receivables (trade notes and accounts receivable) are exposed to credit risk in relation to customers. In addition, the Companies are exposed to foreign currency exchange rate fluctuation risk arising from receivables denominated in foreign currencies. In principle, the foreign currency exchange risks deriving from the trade receivables denominated in foreign currencies, net of trade payables denominated in the same currencies, are hedged by forward foreign exchange contracts.

Investment securities are exposed to market risk. These are share of stock related on our business.

Substantially all trade payables (trade notes and accounts payable) are due within one year. Although the Companies

are exposed to foreign currency exchange rate fluctuation risk arising from those payables denominated in foreign currencies. But the volume of account payable is in the range of account receivable of the same currency.

Regarding derivatives, the Companies enter into forward foreign exchange contracts to reduce the foreign currency exchange rate fluctuation risk arising from the receivables and payables denominated in foreign currencies.

3. Risk management for financial instruments

1) Monitoring of credit risk

In accordance with the internal policies, the Credit Managing division monitors credit worthiness of their customers periodically, and monitors due dates and outstanding balances by individual customer. In addition, the Companies are making efforts to identify and mitigate risks of bad debts from customers who are having financial difficulties.

2) Monitoring of market risks (the risks arising from fluctuations in foreign exchanges rates, interest rates and others)

For trade receivables and payables denominated in foreign currencies, the Companies identify the foreign currency exchange rate fluctuation risk for each currency on a monthly basis and enters into forward foreign exchange contracts to hedge such risk.

The Accounting Division manages risks on derivative transaction, in accordance with the internal policies.

Monthly reports including actual transaction data are submitted to top management for their review.

For marketable securities and investment securities, the Companies periodically review the fair values of such financial instruments and the financial position of the issuers. In addition, the Companies continuously evaluate whether securities should be maintained taking into account their fair values and relationships with the issuers.

3) Monitoring of liquidity risk (the risk that the Companies may not be able to meet its obligations on scheduled due dates)

Based on the report from each division, the Companies prepare and update its cash flow plans on a timely basis to manage liquidity risk.

4. Supplementary explanation of the estimated fair value of financial instruments

The fair value of financial instruments is based on their quoted market price, if available. When there is no quoted market price available, the fair value is determined based on reasonable estimates. Since various assumptions and factors are reflected in estimating the fair value, different assumptions and factors could result in different fair value. In addition, the notional amounts of derivatives in Note 15 Derivative Transactions are not indicative of the actual market risk involved in derivative transactions.

16. Segment Information

(A) Business Segment for the years ended in March 31, 2011 and 2010 (additional information)

Effective the fiscal year ended March 31, 2011, the Company has adopted "Accounting Standards for Disclosures about Segments of an Enterprise and Related Information" and "Guidance on Accounting Standard for Disclosures about Segments of an Enterprise and Related Information".

Effective April 1, 2010, the Company changed its business segment from "Retail Solutions Business Group", "Document Systems Business Group" and "Auto-ID and Printer Business Group" to "System Solutions Business Group", "Document Solutions Business Group" and "International POS, AI & Printer Business Group".

1. Summary of reportable segment

The reportable segments of the Companies are components for which discrete financial information is available and whose operating results are regularly reviewed by the Executive Committee to make decisions about resource allocation and to assess performance.

Aiming the early realization of business expansion and the positional establishment as total solution provider, the Companies create inclusive strategies per market and develop business activity under a framework for business operation per market. Therefore, the Companies report on "System Solutions Business Group", "Document Solutions Business Group" and "International POS, AI & Printer Business Group" as report segments.

2. The calculation method for amounts of sales, income, assets and other items per reportable segments

The Board of Directors
TOSHIBA TEC CORPORATION

We have audited the accompanying consolidated balance sheets of TOSHIBA TEC CORPORATION and consolidated subsidiaries as of March 31, 2011 and 2010, and the related consolidated statements of income, changes in net assets, and cash flows for the years then ended and consolidated statement of comprehensive income for the year ended March 31, 2011, all expressed in yen. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in Japan. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of TOSHIBA TEC CORPORATION and consolidated subsidiaries at March 31, 2011 and 2010, and the consolidated results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in Japan.

The U.S. dollar amounts in the accompanying consolidated financial statements with respect to the year ended March 31, 2011 are presented solely for convenience. Our audit also included the translation of yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made on the basis described in Note 1.
